Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is responsive to amendment filed March 15, 2010.
2. Claims 11-19 are pending. Claim 11 is an independent claim.

Response to Amendments

3. Per Applicant's request, Claim 11 has been amended. It should be noted that Applicant's amendment is non-compliant because the claim amendment is not in a proper format, i.e., the period at the end of the previously presented claim should be shown lined through and the added limitation ", where user must watch advertising to see the content where said users can have a preference in the advertising that they watch." should be underlined. For compact prosecution purposes, Applicant's amendments and arguments have been considered in this Office action.

Response to Arguments

4. Applicant's arguments are moot in view of the new ground of rejection necessitated by Applicant's amendment.

Claim Rejections – 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejection under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for the purposes of this subsection of an application filed in the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 11-19 are rejected under 35 U.S.C. § 102(e) as being anticipated by U.S. Patent Application Publication No. 2003/0229900 A1 by Reisman.

Art Unit: 2421

It should be noted that hereinafter the use of the clause “see at least” should be interpreted that the cited portions that follow the clause are not the only portions that are considered to be relevant. Should Applicant find that the cited portions are not relevant, other portions of the disclosure of the prior art reference will be provided as additional evidence and/or context to the relevancy of the previously cited portions. Since the evidence is from the same reference, the introduction of the additional evidence in response to Applicant’s arguments should not therefore be considered to be that of new grounds of rejection.

Claim 11

Reisman discloses at least *a process comprising a user system (see at least FIG. 1) that includes a client platform (see at least FIGs. 1-2, platform 128) connected to a two way digital tuner equipped device (see at least [0112]; [0176]; [0199]; [0235], e.g., PC-DTV), said client platform regulating processes that authenticate users, content, advertisement (see at least [0292]; [0295-0296]), and royalty distribution (see at least [0529]; [0616]), and said client platform recognizing and reporting to a server platform (see at least FIG. , platform 110) the following information: data about the user (see at least [0302]; [0369-0370]; [0512]; [0537]), the times of user activity (see at least [0189]), the content type ([0026]), the name of said content (see at least [0062]), the time that said content was made available to users by the owner of the content, the number of times said content has been used by or transferred to or among the users (see at least FIG. 6; [0029-0030]), e.g., tracking activity; profiling in [0290], [0370]), the advertisement consumption options (see at least [0526]; [0616]), which advertisement the user has or has not selected in the past (see at least [0526]), the amount of royalties paid, and to whom said royalties were paid (see at least [0525-0529]), where user must watch advertizing to see the content (see at least [0526]; e.g., ad viewings, ad impressions) where said users can have a preference in the advertising that they watch (see at least [0370-0374]; [0550-0554]).*

Claim 12

The rejection of base claim 11 is incorporated. Reisman further discloses *wherein said client platform further controls one or more of the following processes: a selection/or non-selection of content (see at least [0030]; [0115]; [0121-0122]; [0125]), a selection or non-selection of ads (see at least [0115]), playing content, or storing content (see at least [0030]; [0073]; [0118]; [0197]; [0306]).*

Art Unit: 2421

Claim 13

The rejection of base claim 11 is incorporated. Reisman further discloses *generating said client platform for each unique user* (see at least [0002]; [0023]).

Claim 14

The rejection of base claim 11 is incorporated. Reisman further discloses *having said information being stored in one or more databases* (see at least FIG. 1, device 160 or on the iTV/PC), *apis* (see at least [0137]) *or storage units* (see at least FIG. 1, device 160 or storage components in devices 130, 140, 150), *and for which said information is controlled by the actions of said user's input into said user system* (see at least FIG. 1, user's input via device 130, 140 or 150).

Claim 15

The rejections of the base claim 11 and intervening claim 14 are incorporated. Reisman further discloses *wherein said database is contained within said user system* (see at least FIG. 1, database stored on iTV's memory to PC; [0118]; [0610]).

Claim 16

The rejection of base claim 11 is incorporated. Reisman further discloses *wherein said user system is a television receiver* (see at least FIG. 1, device 130).

Claim 17

The rejection of base claim 11 is incorporated. Reisman further discloses *wherein said user system is a computer* (see at least FIG. 1, 140).

Claim 18

The rejection of base claim 11 is incorporated. Reisman does not specifically disclose *assigning a unique code for each respective advertisement uploaded by a participating advertiser*.

However, Reisman discloses participation of advertisement authors in [0071]. Thus, the feature of assigning a unique code for each respective advertisement uploaded by a participating advertiser is deemed inherent to Reisman because without such an identification code, how could content providers keep track of advertisements targeted to customers for customization and billing purposes.

Claim 19

The rejection of base claim 11 is incorporated. Reisman further discloses *wherein said user system comprises a set top box connected to a display device* (see at least FIG. 2b, STB 260 connected to TV 262).

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
